

# ESTATE RAILING

## PRODUCT OVERVIEW

Estate Railings are our traditional estate fencing system. This system is ideally suited to country estates, residential and heritage sites, parkland, wildlife parks, paddocks farmland and large rural residences with a low to medium security risk. Estate Railings are particularly effective at marking boundaries and confining livestock in an aesthetically pleasing fashion.

Our Estate Railings are manufactured from high quality, durable materials and hot-dip galvanized to enhance

lifespan. We have designed with the challenges of rural environments in mind, so continuous bar railings can be easily curved to follow the contours of uneven ground.

Estate Bar Railings are available in heights of up to 1.2m, in a hurdle form welded construction. Gates can also be manufactured to suit the style, including kissing gates and tree guards. All of our railing systems can be raked, stepped or curved upon request.

## TECHNICAL INFORMATION

Product Name	Estate Railing
Available Heights	Up to 1.2m
Nominal Heights	Up to 1.2m
Horizontal Sections	Solid Round Bar / Hollow Round Bar / Flat Bar
Topping Type	Bow Top
Ground Clearance	Set panel approximately 75mm above ground level
